

SYSTEM DESCRIPTION

The water filtration system features exclusive Fibredyne™II bacteriostatic media that filters sediment down to 0.2 micron* and provides chlorine taste & odor reduction at a flow rate of 5 gpm for 50,000 gallons. Integrated scale inhibitor media helps protect against the formation of scale on equipment surfaces. This system is certified under NSF/ANSI Standards 42 and 53.

FEATURES • BENEFITS

Integrated scale inhibitor minimizes the potential for scale formation to ensure reliable, efficient equipment operation

Proprietary Fibredyne II media reduces chlorine taste & odor while providing particulate reduction down to 0.2 micron*

Fibredyne II media inhibits the growth of bacteria within the filter to guard against media fouling and optimize performance

Inlet shutoff valve, flush valve, and pressure gauges simplify service and monitor operating performance

Quick-change (QC) cartridges make changing cartridges simple and sanitary

Reduces a range of contaminants to help ensure clearer, fresher water for consistently great-tasting beverages

Helps protect equipment to help ensure

100°F (38°C).
