

SYSTEM DESCRIPTION

Leveraging proprietary technology, the system uses Reverse Osmosis (RO) to reduce Total Dissolved Solids (TDS); it provides up to 200 gal/day (757 L/day)* and includes a 16-gallon (60.6 L) hydropneumatic tank. Ideal for applications where RO is necessary to meet manufa.018 7water requirements

X Steamers

Proofers

FEATURES • BENEFITS

Meets combi oven and steamer equipment water quality standards; known to significantly reduce scale and corrosion problems due to high TDS, water hardness*, and chlorides[†]

4CM cartridge provides optimal mineral content for proper function of conductivity sensors on steam equipment

Non-electric design operates on available water pressure[†]

Sealed hydropneumatic storage tank provides capacity and pressurized water to downstream equipment

Pressure gauge allows monitoring of RO inlet pressure and prefilter condition

Built-in bypass, sample port and flush valves speed up installation and cartridge replacement
