

HEAVY DUTY RECIPROCATING PUMPS FOR SEWER JETTER APPLICATIONS

When the job needs to get done, your pump needs to be up for the challenge. As the only pump manufacturer that has also built sewer jetter trucks, we understand what you need in a pump. Our heavy-duty pumps are built for long life to maximize your uptime, and designed for easy maintenance for the shortest down time possible. We deliver what others only promise!

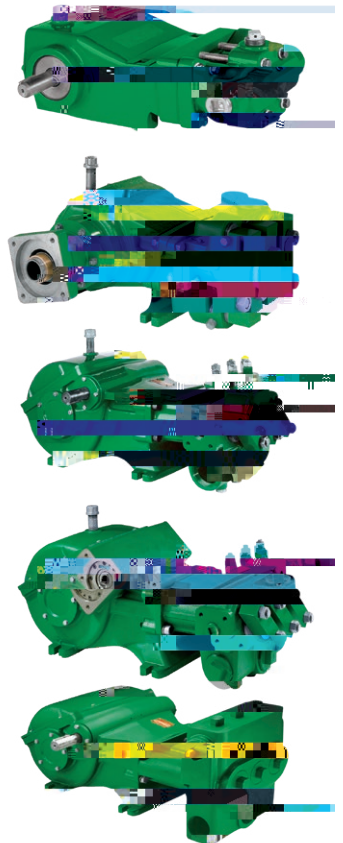

Heavy-duty cast iron construction dampens vibrations and provides superior heat dissipation for cooler operating temperatures and long life

Up to 30 minute dry run on select models*

Slower RPMs reduce component wear for greater reliability and longer service life

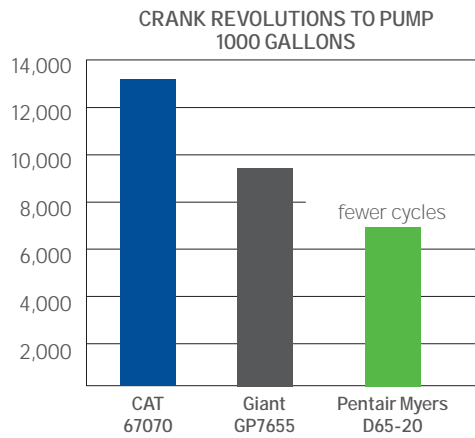

Larger access room for faster, easier repairs and reduced downtime

Packing and valves on models C, D, DP and E can be serviced while the pump is on the truck without having to remove the fluid-end

Series	GPM	PSI
CX	4-21	1500
C	25-40	2500
D	35-65	2000
E	54-110	3000

Series	GPM	PSI
DP*	26-113	5500
