

PENTAIR® DYNAMIC TORQUE CONTROLLER MODULE

GULF BREEZE, FLORIDA

"We were pulling the pumps once or twice a month, removing heavy rags and syringes from the neighboring medical facility. Since installing Dynamic Torque Control technology¹ almost a year ago we haven't had to pull the pumps ever again."

Dynamic Torque Control technology installed Spring 2017.

- ◆ The technology smartly monitors pump performance in real time and detects and passes debris, keeping pumps clog free.

- ◆ Reduction in clogging, have not had to pull pump in almost 12 months.
- ◆ Reduction in labor associated with servicing.

Once or twice every month down to zero. 100% reduction in clogging.

¹Actual results and performance may vary based upon site and operating conditions.
²Dynamic Torque Control technology is a licensed and branded version of the Deragger™ technology.
