

A rugged one piece molded inner liner constructed of premium high-density polyethylene. Each tank is wrapped with miles of over lapping, continuous fiberglass strands, sealed with high grade epoxy resin, which is then oven cured, making the outer shell impervious to rust, dents, and ultraviolet rays.

- ◆ Rigid ABS is the sturdiest composite base on the market. Corrosion and impact resistant. Base rotates 360° for ease-of-service hook-up.
- ◆ Threaded for ease of installation.
